Narayanganj, Dhaka

SUMMARY

I am a confident, innovative, and hard-working Mobile Application Developer with a strong focus on Flutter and Native Android development. I seek to design and build scalable, user-centric mobile applications while continuously enhancing my technical proficiency and architectural expertise in a dynamic, growth-oriented environment

EXPERIENCE

Mobile Application Developer

SoftifyBD LTD

01/2022 Narayanganj

Mobile application development company

- Developed Admin, MAC (Manager/Accountant), and Client portals using Flutter and Native Android
- Implemented Admin modules including bill collection, billing lists, POS printer integration, task management, support ticketing, live zone-wise client analytics, and comprehensive billing, discount, and accounting reports
- Built MAC modules featuring fund recharge, recharge transaction tracking, credit transaction management, and payment gateway integration
- Developed Client modules such as invoice and payment history, online payment processing, package management, ping testing, news and events, and profile management
- Applied Clean Architecture principles with Riverpod for state management and integrated RESTful APIs for scalable and maintainable application development

B.Sc in Software Engineering

Daffodil International University

01/2018

Higher Secondary Certificate

Dhaka Residential Model College

01/2015 - 12/2017

Secondary School Certificate

B.M Union High School

01/2013 - 12/2015

SKILLS

Flutter

Mac OS

Wwise

Gateway

REST

Modular

Dart

Java

Python

MVVM

Git

PROJECTS

Edufy

01/2022

Education Management System project

- Built Admin, Student, and Teacher portals using a feature-based modular architecture
- Developed Student features including notices, activity tracking, class and exam routines, leave applications, discipline history, document management, and payment receipts
- Implemented Teacher features such as student lists, activity assignment and tracking, attendance management, marks entry, notices, and discipline management
- Designed Admin features covering student and employee attendance, leave management, notice and discipline modules, accounting, marks entry, and routine management
- Utilized Flutter Clean Architecture with Riverpod for state management, ensuring a scalable, maintainable, and testable codebase

ISP Digital

01/2022

ISP Management System project

- Developed features tailored for various user roles in the platform
- Integrated payment processing and analytics for administrators
- Managed tasks and support systems contributing to operational efficiency
